Walker

Let's go for a walk!

The JoB Walker is a walker that allows people with temporary or permanent disabilities to access harsh environments such as the beach or snow. This is obtained thanks to the use of patented innovative solutions from Neatech, as the wheels made of plastic material with controlled deformation that do not sink on soft soils. The frame is made of light aluminum alloy, a material that guarantees a high resistance both to bending stress caused by the support of the user's weight and to the pushing strength, and to the saline environment corrosion. The JoB Walker is a walker for people with physical disabilities or simply with mobility problems due to the age, who wish to deal with soft and irregular soils on whose it would be impossible to use traditional supports. The wheels, always ensuring the greatest possible surface for resting on the ground, allows ambulation not only of sand or snow, but also on other types of non-cohesive soils such as meadows, all these make this product a valid aid usable in all seasons and in all contexts. The folding seat allows the user to sit down for a stopover on the way, or to enjoy the sightseen. The back and seat are made of sturdy fabric characterized by rapid drying that does not incorporate the grains of the sand.

FEATURES

Built with sea water resisting materials

Folding seat for maximum ease of use

High maneuverability and support on inconsistent grounds

Ergonomic and comfortable

Adjustable handles

Demountable chassis

TECHNICAL SPECIFICATIONS

Total length	380 mm
Total width	900 mm
Minimum transport length	900 mm
Seat height	500 mm
Total weight	5,5 kg + 3kg x wheel
Maximum user weight	100 kg
Seat width	460 mm
Seat depth	390 mm
Backrest width	460mm
Backrest height	445 mm
Backrest angle-adjustable	fixed
Legrest angle-adjustable	fixed
Warranty	2 years
EN12182 CE	yes
